Superintendent's Highlights

Our patrons have again generously passed a Supplemental Levy. Using those funds, we have several vocational, extracurricular and academic programs we would not otherwise be able to offer. We are also able to give our staff a good compensation package. This enables us to better attract and maintain quality educators.

Using state technology and local education foundation funds, we have up-to-date computers in each classroom and in our building labs. We also have satellite stations for writing or language development. Internet connections in the classrooms are increasing.

Aberdeen is a wonderful place to live and raise a family. We continue to attract new families to enjoy the quality of life and education available here.

Progress Towards Meeting District Goals

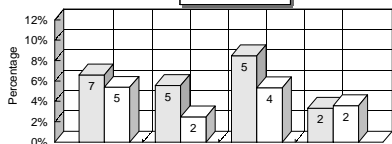

1996-97 Goals	Progress
Increase classroom space	A citizens' building advisory was established. Working closely with the district architect, school board and administration, the committee chose to build a new middle school. We got a 58% yes vote in the bond election. We will try again once the agricultural economy strengthens.
Increase reading scores	Our elementary teachers and administrators worked together to bring in a strong phonics instruction program and ability grouped the students for reading instruction. Special Education and Title I instructors focused on the lower groups. The upper groups were challenged. Reading scores are climbing, most significantly in the lower groups.
Better communication with teachers	The board set up an information sharing meeting with the teachers. Teachers' concerns and suggested solutions were discussed.
Increase technology and Internet	Along with building labs, we now have up to date computers in each classroom, all networked back to the building lab. Some teachers have Internet links. Our goal is to have Internet capabilities in each classroom.
